Why choose OURTECH for ICT solutions?

CORPORATE PROFILE

Company Overview

OURTECH Information Technology Solutions is a Filipino-owned ICT services and integration company delivering enterprise-grade technology solutions to public and private organizations. Established in 2022, OURTECH has rapidly positioned itself as a trusted partner for digital infrastructure, cybersecurity, emergency communication systems, IoT technologies, and advanced monitoring solutions.

Our strength lies in combining technical expertise, operational discipline, and strategic insight—backed by a team composed of ICT professionals, engineers, cybersecurity practitioners, military communication specialists, and educators. We design solutions that are reliable, scalable, and aligned with global industry standards, while retaining the agility and responsiveness of a modern tech company.

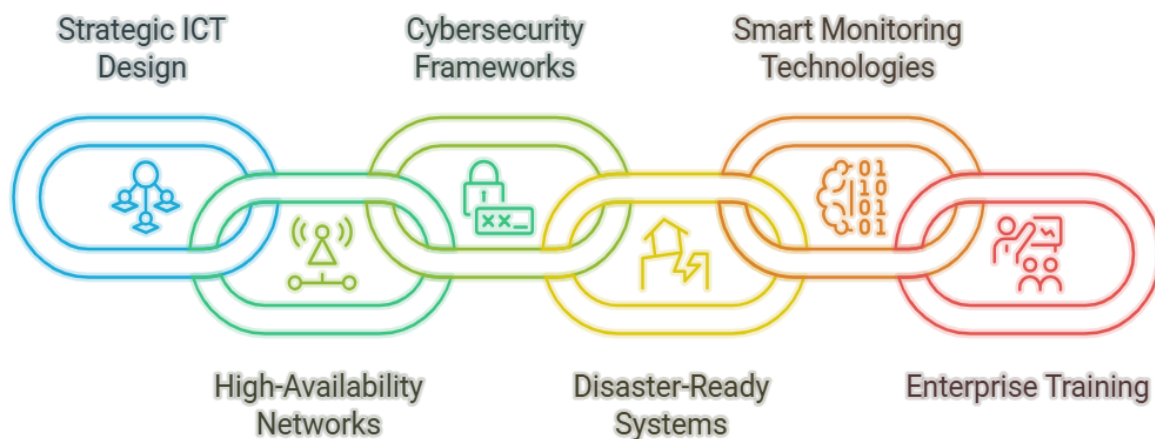

Headquartered in Baguio City with extended operations in Pangasinan, OURTECH is a DTI-registered MSME fully compliant with BIR and relevant LGU requirements.

OUR VALUE PROPOSITION

Technology Built for Performance. Solutions Built for Longevity.

In a landscape where digital stability, security, and resilience define organizational success, OURTECH provides:

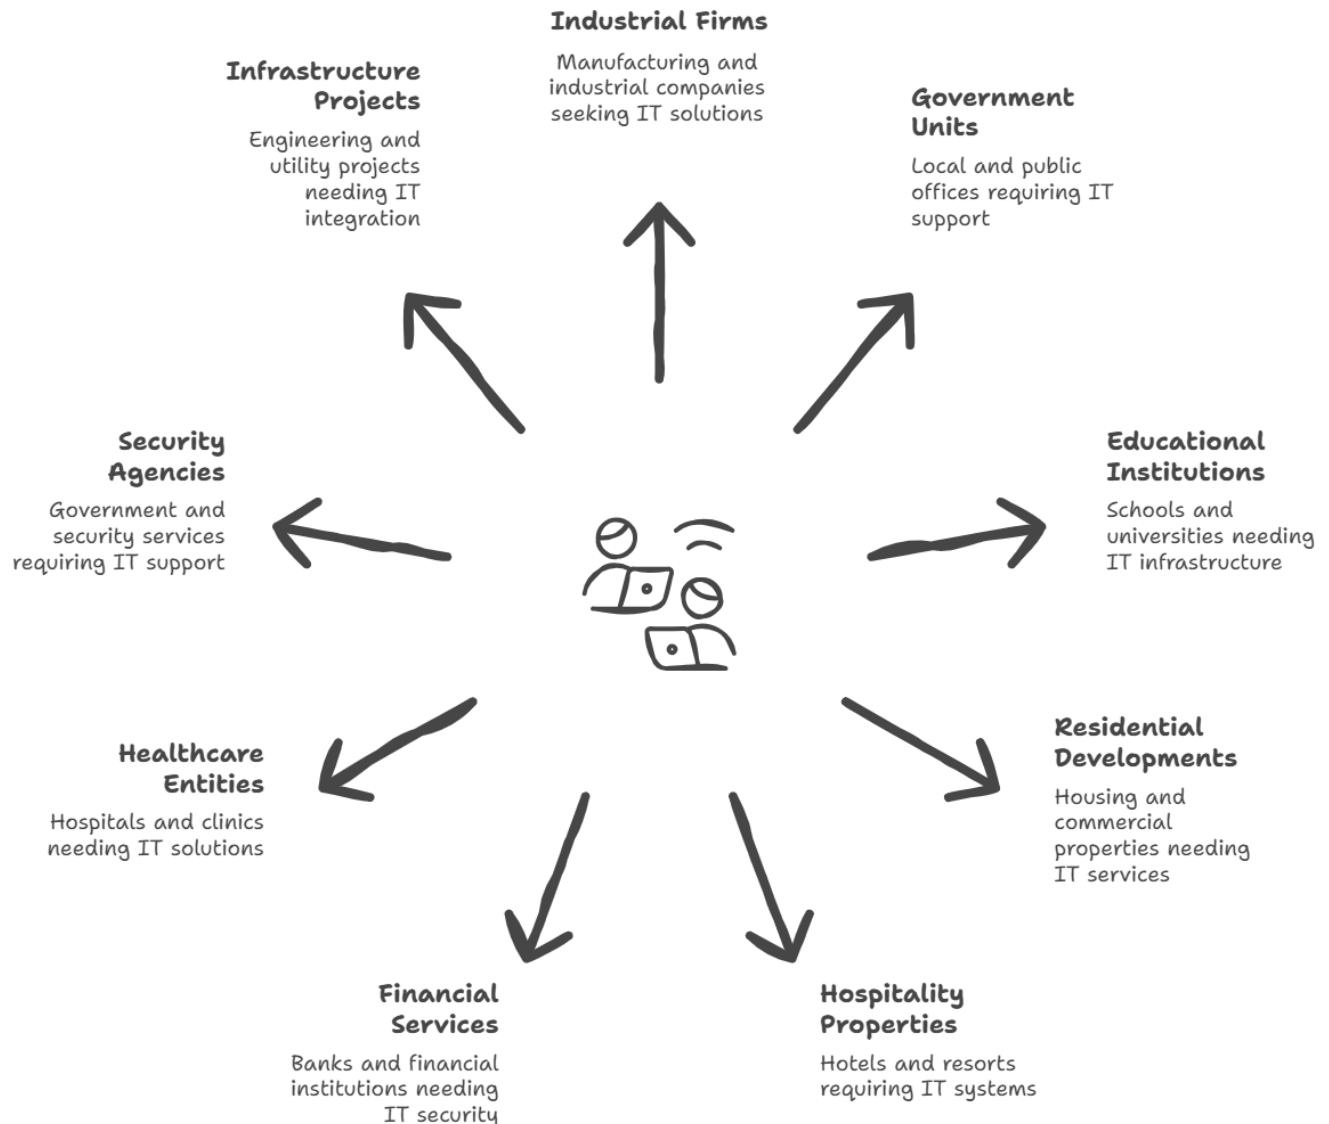

OURTECH's Core Technology Solutions

Everything we deliver is guided by one commitment: To ensure that technology empowers your operations—consistently, securely, and efficiently.

OUR CLIENTS

We serve a broad portfolio across multiple sectors:

Through these engagements, OURTECH has earned a reputation for **precision, reliability, and strong after-service support.**

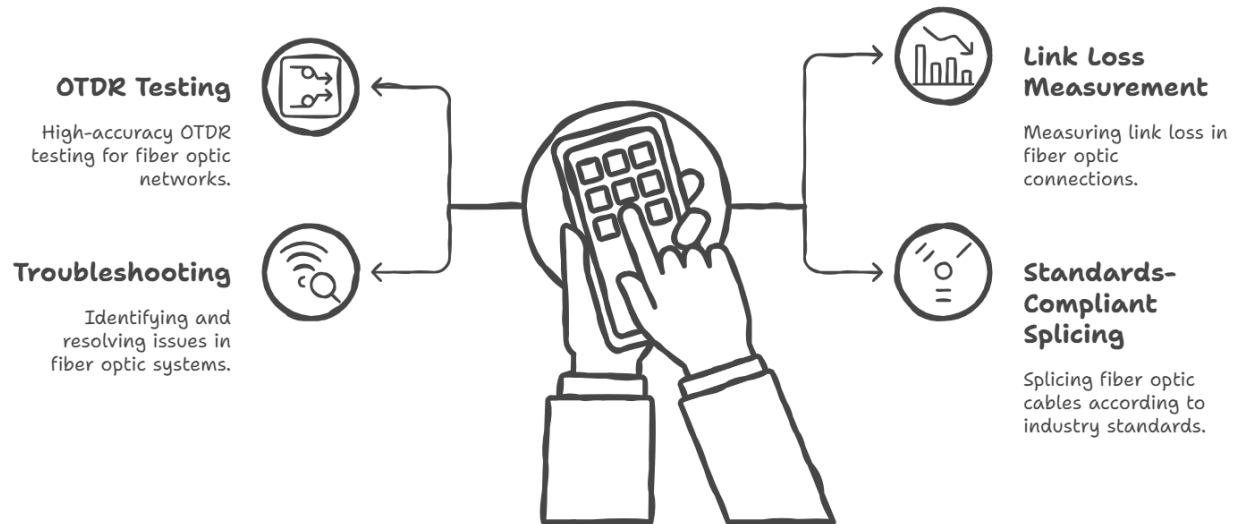

CORE BUSINESS SOLUTIONS

1. Network & Infrastructure Engineering

Delivering mission-critical connectivity for corporate and institutional environments.

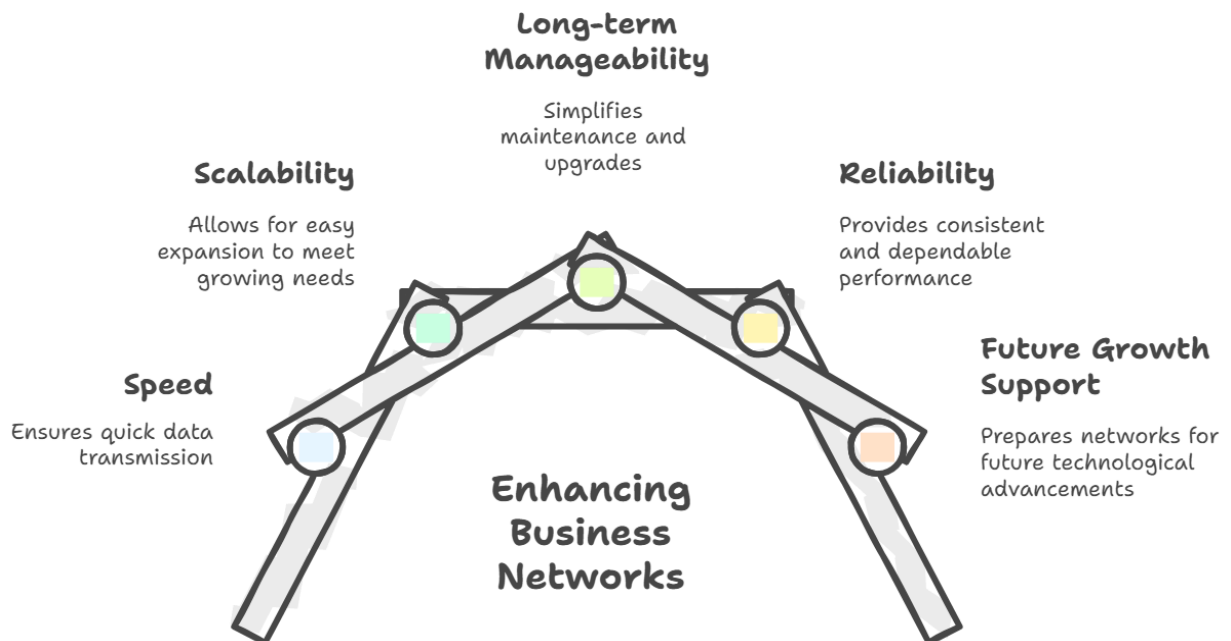

Fiber Optic Testing, Splicing & Certification: High-accuracy OTDR testing, link loss measurement, troubleshooting, and standards-compliant splicing.

Fiber Optic Services

Structured Cabling & Network Standardization

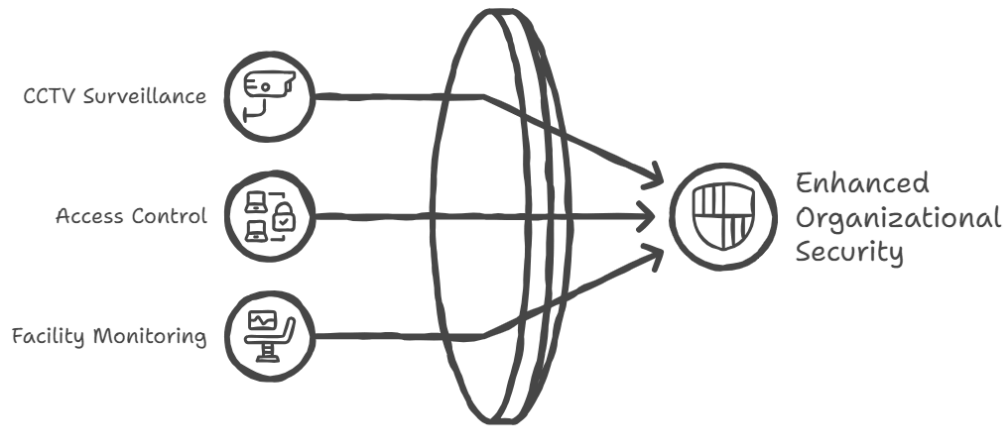

Enterprise-grade copper and fiber installations designed for speed, scalability, and long-term manageability.

Enterprise Surveillance & Security Systems

Comprehensive CCTV, access control, and facility monitoring architectures.

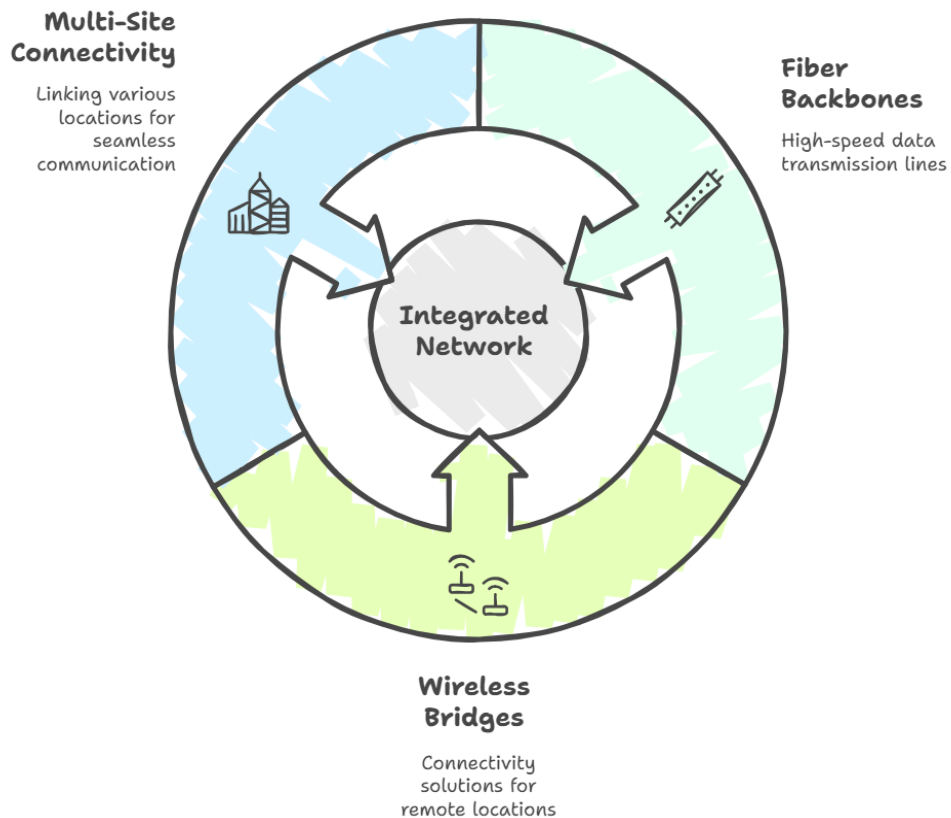

Building a Secure Environment

Campus / Metropolitan Network Integration

Fiber backbones, wireless bridges, and multi-site connectivity for LGUs, academic campuses, and large facilities.

Components of Campus/Metropolitan Network Integration

2. Cybersecurity & Information Assurance

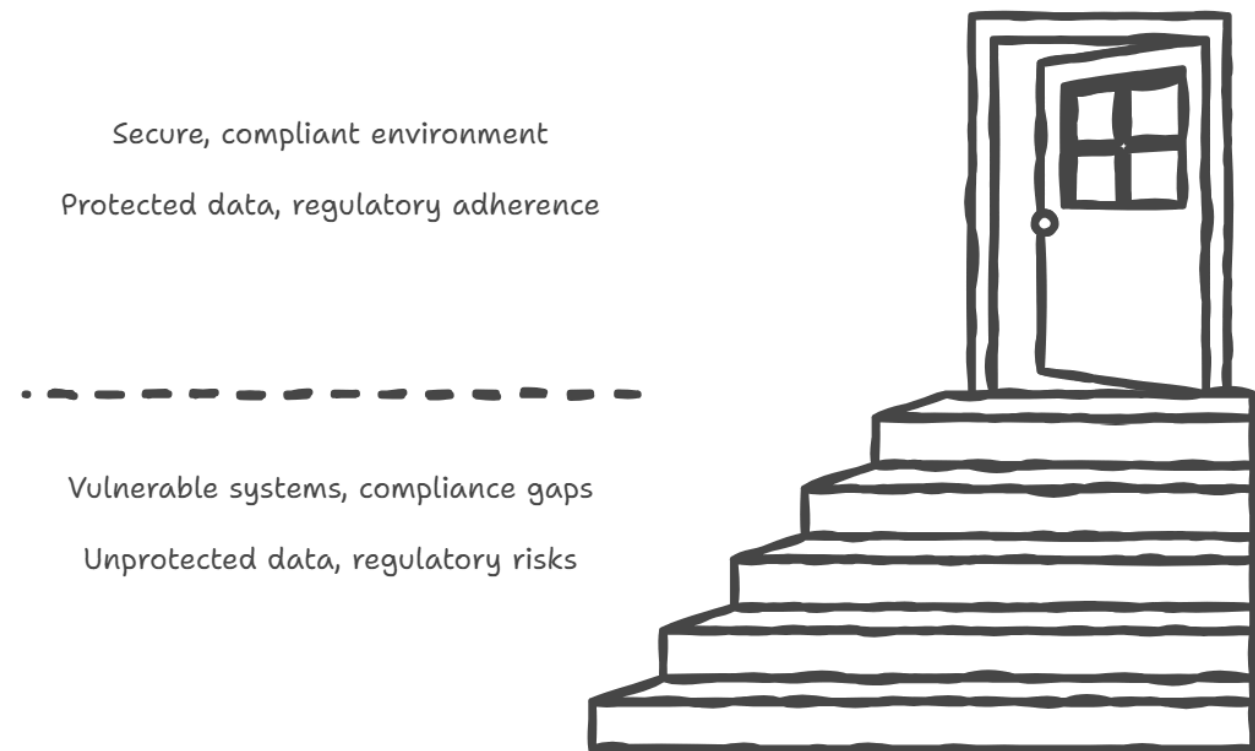

Strengthening digital resilience through secure-by-design frameworks.

Cybersecurity Architecture & Defense Solutions Firewalls, endpoint security, identity management, SIEM logging, and zero-trust alignment.

Information Security & Compliance Consulting

Advisory based on ISO 27001:2022, NIST CSF, NPC Data Privacy Act, and international security standards.

Secure information through robust cybersecurity and compliance.

3. Emergency Communication & Public Warning Systems

Reliable communication and alerting infrastructures for crisis and disaster environments.

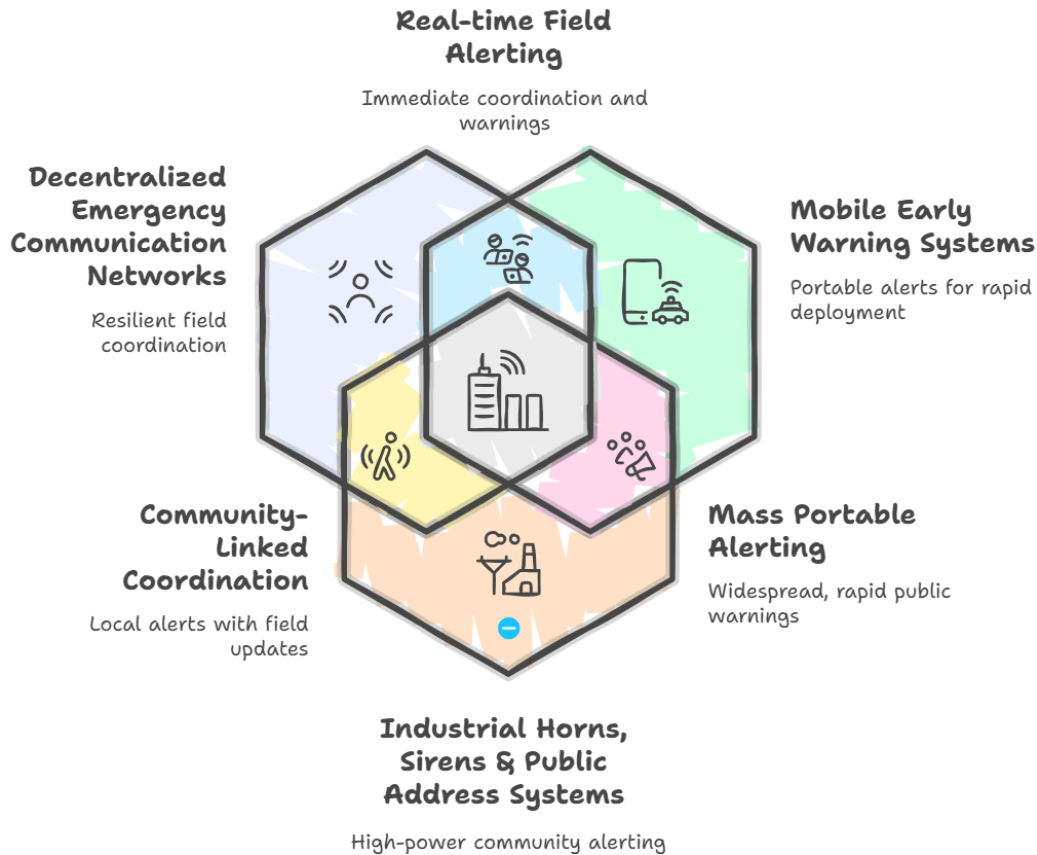

Decentralized Emergency Communication Networks Mesh, radio, and wireless solutions for uninterrupted field coordination.

Mobile Early Warning Systems Portable communication devices for emergency and rapid-deployment teams.

Industrial Horns, Sirens & Public Address Systems

High-power alerting systems designed for communities, campuses, and industrial locations.

Overlapping Emergency Communication Capabilities

4. IoT & Smart Monitoring Technologies

Sensor-driven intelligence for environmental, industrial, and civic operations.

Which IoT monitoring solution best suits your needs?

IoT Weather Monitoring

Real-time environmental data

AI Water Level Monitoring

Predictive flood control

5. Aerial Data & Drone Technology

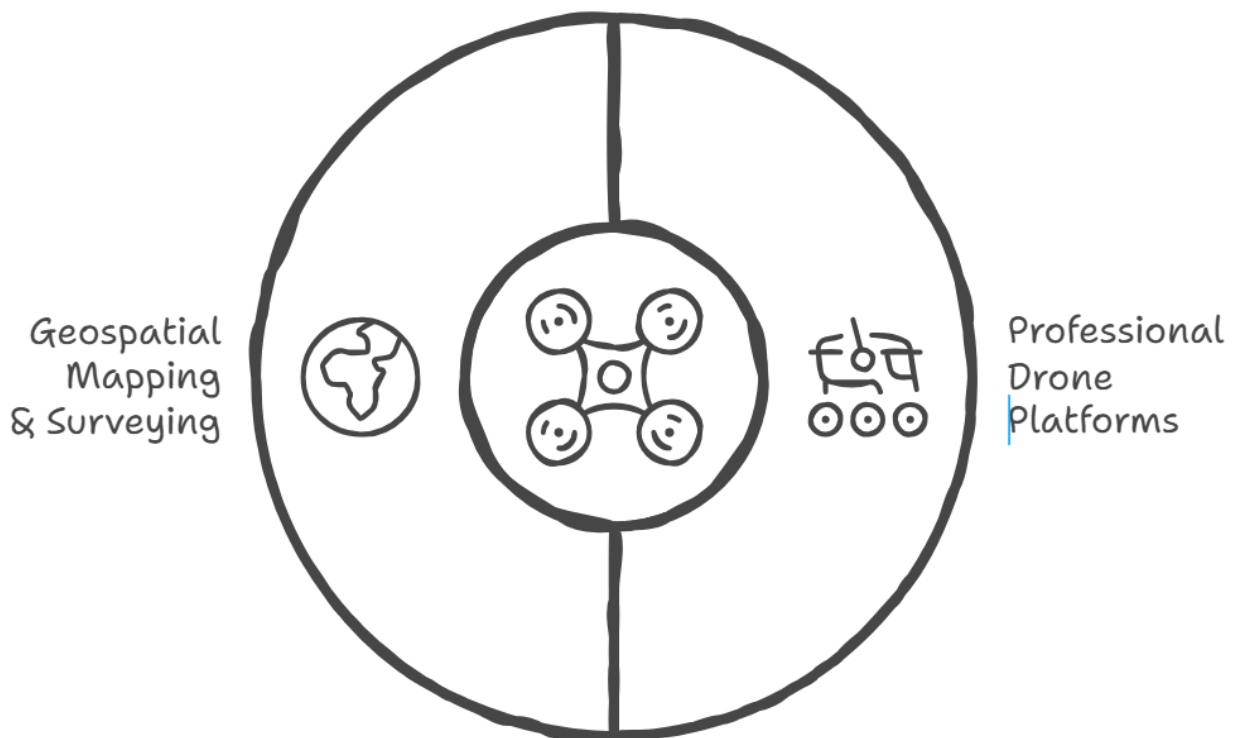

High-precision aerial intelligence for engineering, agriculture, and emergency operations.

Professional Drone Platforms Optical, thermal, multispectral, and LiDAR systems for enterprise missions.

Geospatial Mapping & Surveying

Orthomosaics, DEMs, 3D models, volumetric calculations, and infrastructure assessments.

Comprehensive Aerial Data Solutions

6. Governance, Risk & Compliance (GRC)

Practical compliance frameworks aligned with global standards.

ISO 27001:2022 – Information Security Management System

- Gap Analysis
- Risk Assessment & Treatment Planning
- Asset Inventory & Classification
- ISMS Documentation
- Internal Audit & Audit Readiness
- Awareness & Competency Training

ISO 20000-1:2018 – IT Service Management System

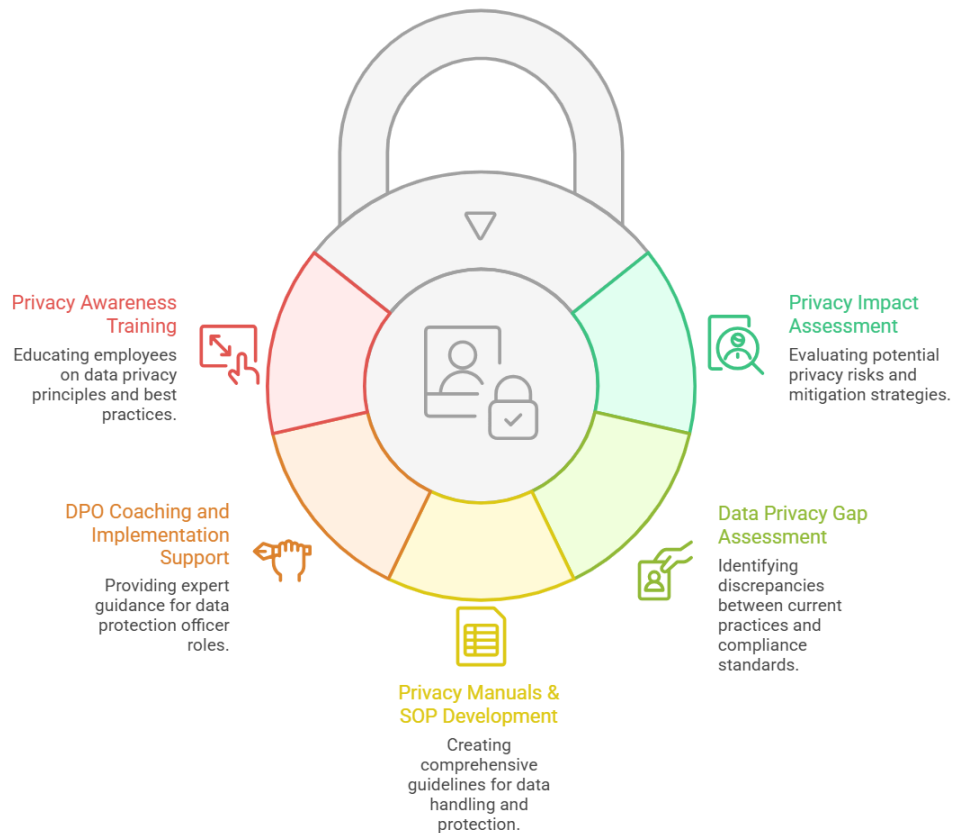

- ITSM Gap Assessment
- Documentation & Service Processes
- SLA & Service Catalog Development

- Internal ITSM Audit

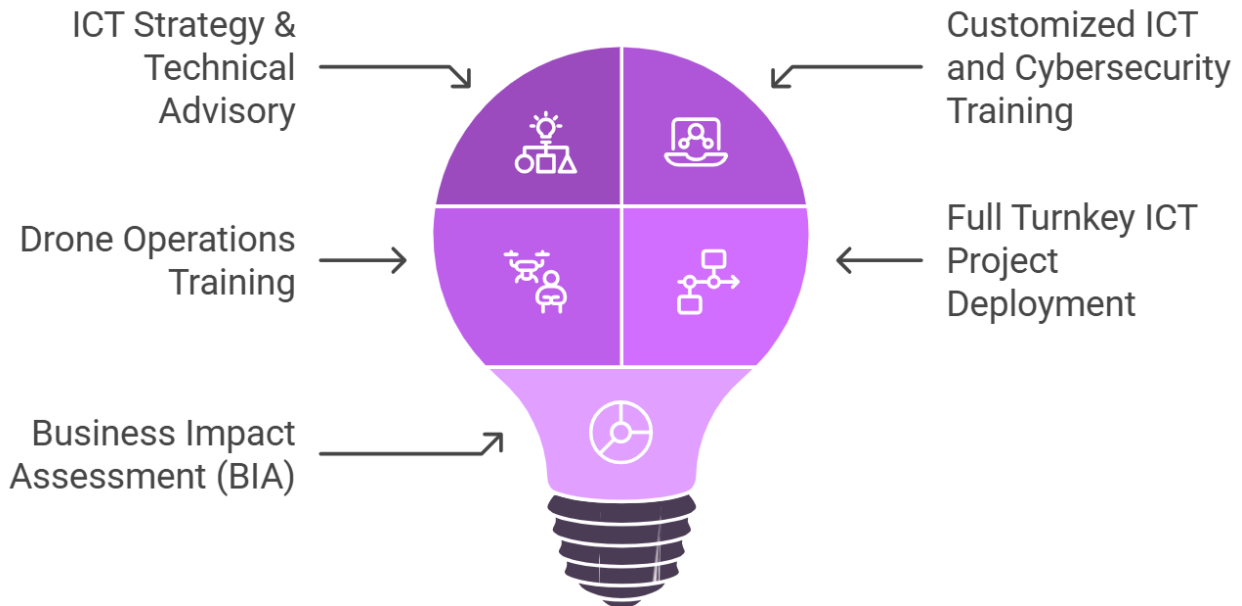

7. Data Privacy & NPC Compliance

Data Privacy Compliance Framework

8. Consulting, Training & Turnkey ICT Implementation

Comprehensive ICT Solutions

WHY PARTNER WITH OURTECH

Enterprise-Caliber Delivery: We engineer solutions designed to perform reliably in mission-critical environments.

Strategic, Standards-Aligned Approach: Our methodologies follow ISO, NIST, ITSM, NPC, and global industry frameworks.

Client-Centric Customization: Each solution is tailored to operational realities, financial requirements, and long-term organizational goals.

Agility with Discipline: We combine the speed of a modern tech firm with the rigor of enterprise service delivery.

Commitment to Excellence: Your operational success is our foremost priority—supported by responsive service and long-lasting solutions.

Technology is no longer optional—it is the backbone of operational excellence, resilience, and competitive advantage.

OURTECH stands ready to help your organization build a **secure, connected, and future-ready ICT ecosystem** that meets the demands of today and anticipates the needs of tomorrow.

OURTECH Information Technology Solutions

Technology that works. Solutions that last.

OURTECH's Partnership Pillars
